## Our Aim

- 🌀 Our aim is to restore, transform and maintain your investment to a high standard for generations to come.
- 🌀 To complete your project, on time, right the first time, with no snags.
- 🌀 To listen to your needs and to deliver on your expectations.
- 🌀 To be reliable and offer permanent solutions.

**Residential**

**Commercial**

**Industrial**

## The MD

- Moist is managed by Anthony Abrahams, a dynamic entrepreneur who can speak 7 languages.
- Anthony is an Operations Management university graduate with 15 years experience in the Waterproofing Industry.
- He is also the founder and Chairperson of BGH and SST.
- He is a reliable and dedicated employee and manager of Moist.

## The Staff

- Moist employs 21 hard-working staff.
- These men and women have all done their time in the Industry, and are all highly experienced in their respective fields.

## Our Suppliers

We only use top  
quality materials  
from preferred  
suppliers

Paint with imagination

MIDAS

a.b.e. Construction Chemicals (Pty) Ltd

## What we offer

### **Waterproofing:**

- A highly specialized area that we do not compromise on.
- Our Managing Director is a qualified waterproofing expert with 15 years experience in a wide variety of waterproofing systems, i.e. flat roofs, parapets, flashings, showers, balconies and dam linings.

### **High Pressure Cleaning:**

- A process that ensures the preparation of a sound surface before any application.
- We remove all loose materials, dirt and grime and eliminate fungal growth with special environmentally friendly, industrial liquids.

### **Tanking:**

- A below natural ground level waterproofing system which is often and easily omitted during the building process, resulting in rising damp.
- We can re-instate this for you.

### **Joint Sealing/Expansion Movement Joints:**

- A not so logical area where the expansion and retraction of two different materials come together and can be the cause of major water ingress, e.g. between walls and window frames.
- Our special equipment and use of approved materials makes this an easy elastic process.

### **Spalling Concrete:**

- This is a critical area that represents the structural integrity of your building. One of our strong points.

### **Specifications:**

- Our quotation systems (specifications) have been classified as impressive, self explanatory and in detail, so much so that we use the same specification as a step-by-step work sheet for our production teams.

### **Damp proofing:**

- We remove the defective plaster and inject a silicone water repellent into your interior walls for a long lasting protection, thus ensuring a fungal free healthy environment.

### **Wall, floor and roof painting:**

- We consider this the final stretch, the beautification process where we assist you with choosing the right colours to create that “wow” impact regardless of the building’s age.

### **Construction:**

- Screeding, tilling, plastering, plumbing, electrical and dry walling.
- Asbestos refurbishing and removals

## Why us?

- 🌀 What we do know and understand is that property is probably your most valuable asset.
- 🌀 We offer our in-depth knowledge and applications of a wide range of waterproofing and painting products and systems, together with our detailed specifications (quotations).
- 🌀 **Moist** operates in the Western Cape with offices in the North, South and Central regions.
- 🌀 Our crew is on standby 24/7, especially for all your waterproofing requirements.
- 🌀 We are the ***moist*** reliable...

## Our pledge to you

- 🌀 When you need us most, we won't disappoint.
- 🌀 We don't take short cuts and we only use quality materials.
- 🌀 When you hire **Moist** for your project, we pledge our service, trust and dedication.
- 🌀 Reliability is our top priority.
